S

Steps

① Place (4, 2 south) ~~N~~ step 1. (S1)

② Move step 2 (S2)

③ Left stepB (S3)

④ move step 4 (S4)

move needs to move arrow to 5 column but it does not exist ∴ so arrow can't be moved

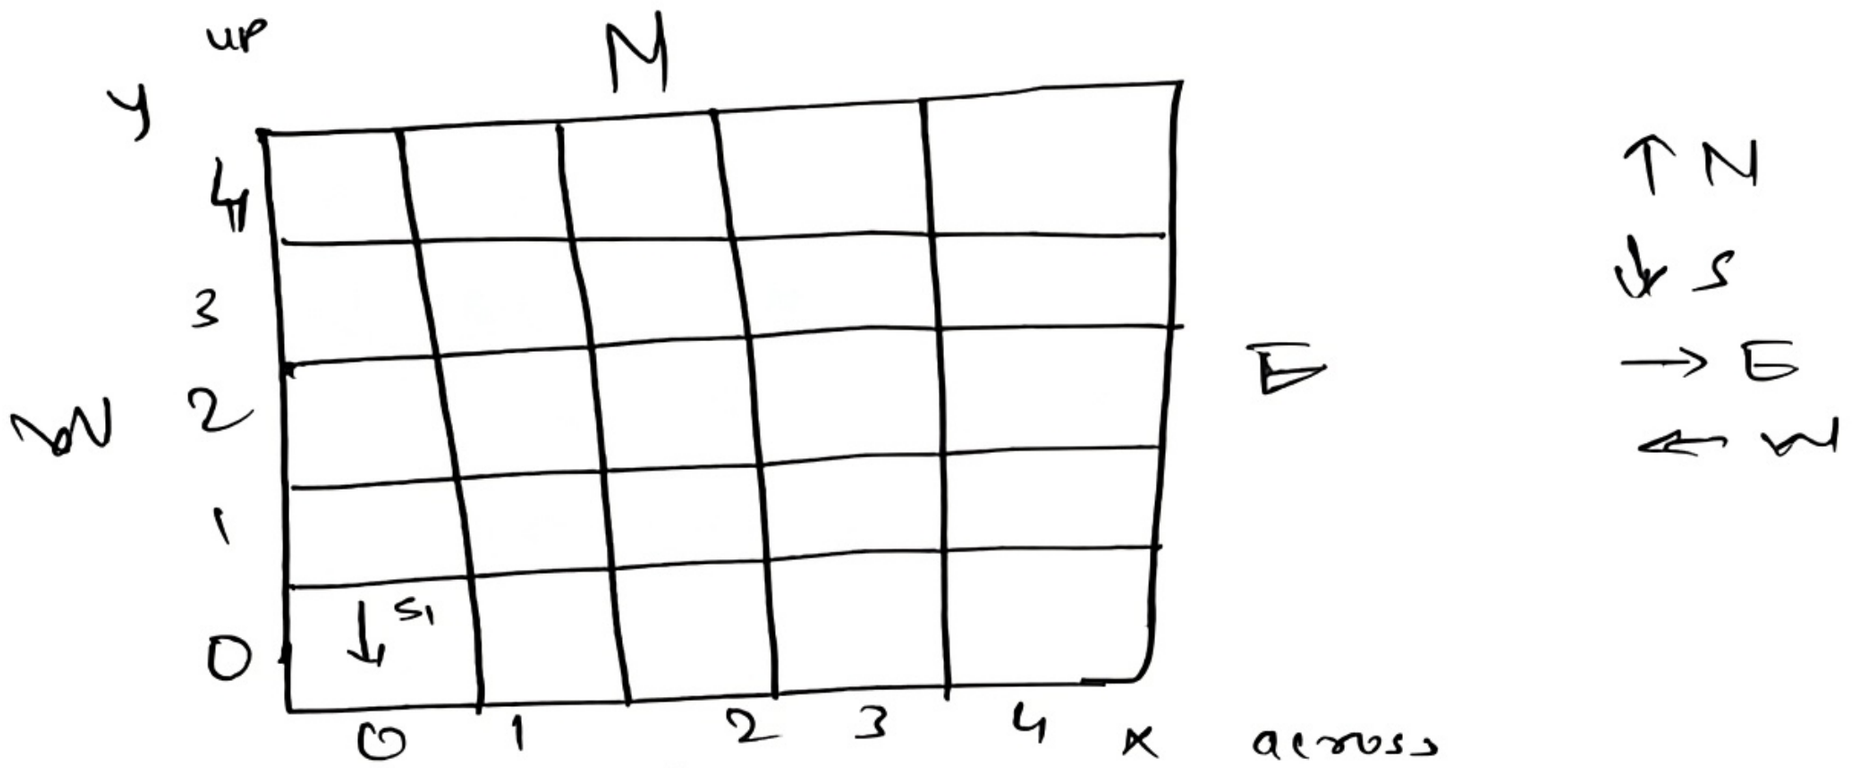

Steps

- Place 3, 4 W — S_1
- move — S_2
- move — S_3
- Left — S_4
- move — S_5
- Right — S_6
- move — S_7

~~Right~~

~~Left~~

North → East → South → We

Steps

① Place 0,0 south — S_1

② Move - This move will try to move the arrow to square below but the arrow is at (0,0) coordinate is moving downward to south will result in negative y axis which means off the board & hence we will not move the arrow.
